

Foil Cutter FC

The foil cutting device cuts the film from the roll and feeds it to the further packaging process. The system is characterised by a high degree of variability and can therefore be designed to meet the different customer requirements.

Technical data:

Output range	max. 120 products/min
Label width	70 – 275 mm
Product thickness	on request
Product features	on request
Positioning accuracy	+/- 1 mm (application-oriented +/- 0.1 mm)
Format settings	reproducible mechanically adjustable
Product infeed	controlled film unwinding system
Controller	freely parameterisable, recipe management
Operation / HMI	HMI 8.4" colour touch screen pushbutton on HMI HMI 280° rotatable
Indicator lights	green, orange, red (standard)
Power connection	13AT / 230V / 50/60 Hz / LNPE
Power requirement	on request
Drive	servo drive low noise
Material	anodised aluminium / stainless steel
Weight	project-specific
Weight	project-specific
Mounting options	project specific design

Options:

Printing system	project-specific printer solutions
Storage system	project-specific (direct, stacking device)
Product testing	project-specific
Rejection station	product rejection, project-specific
Base frame	mobile and adjustable stand, various mounting options
Safety protective device	project specific design
Communication interface	I/O (standard) OPC-UA OPC-UA via Ethernet TCP/IP Industry 4.0
Validation	project specific design
Special solutions	on request
