

SpaceFeeder SF

The SpaceFeeder is a separating and feeding machine for bulk products. Up to 300 products per minute can be prepared for the subsequent packaging process. The system is modular and can be designed for different products.

Technical data:

Output range	max. 300 products/min
Product format	40 x 50 mm to 300 x 400 mm
Product thickness	on request
Product features	on request
Products	various
Positioning accuracy	+/- 2 mm (application-oriented)
Format settings	reproducible adjustable via touch panel (recipe parameters)
Controller	freely parameterisable, recipe management
Operation / HMI	HMI colour touch screen pushbutton on HMI
Indicator lights	green, orange, red (standard)
Power connection	25AT / 3x400 V / 50/60 Hz / LNPE
Power requirement	on request
Drive	powerful servo drive low noise
Material	anodised aluminium / stainless steel
Weight	project-specific
Weight	project-specific
Mounting options	project specific design
Safety protective device	integrated

Options:

Robot removal	precise positioning in motion
Product feeds	project-specific infeeds
Discontinued versions	project-specific outlets (direct, stacking device)
Product testing	integration of camera or code reading systems
Rejection station	product rejection, project-specific
Communication interface	I/O (standard) OPC-UA OPC-UA via Ethernet TCP/IP Industry 4.0
Validation	project specific design
Special solutions	on request
